

SERVER INFORMATION FOR EMAIL PROGRAMS OTHER THAN OUTLOOK

When you create a new account you will be asked for at least the following information in no particular order. Please enter it as is. If you are asked for additional information that is not included on this sheet please contact tech support at 248-625-0817x4

Name: Your name as you want it to appear on your emails

Email address: Your email address

Incomming/POP3 Server: mail.igdsolutions.com

Outgoing/SMTP Server: mail.igdsolutions.com

User Name: Your email address using a % instead of a @ sign. (info%widgets.com)

Password: 1234 (You can change it by logging into webmail at

<http://mail.igdsolutions.com>)

Somewhere there should also be a setting that needs to be enabled for the outgoing server to require authentication. This is not secure (SSL) authentication, but it will be worded similar to “my outgoing server requires authentication”

This should cover everything you will be asked for, but remember that if you have any questions we are only a phone call away.
